ABOUT US

M K Proteins is Manufacturer, exporter and local supplier of peanut oil, Peanut Cake, processed peanuts and raw peanuts. We are having one of the largest plant in India with production of more than 150 Tons per day for Raw peanuts and over 40 Tons per day for Peanut oil covering an about 200000 Sq Feet area.

M K Proteins established in 2022 considering as one of the trusted brand in manufacturing and processing of best quality peanut and peanut oil. Our team is having experience of over 40 Years in peanut Industry and have proper grip from Farm level till processing level.

PRODUCTS

GROUNDNUT IN SHELL

Counts : 20/24, 22/24, 24/28

Moisture : 7% Max

Admixture : 0.5% Max

JAVA

Counts : 50/50, 60/70, 70/80,
80/90, 90/100, 100/120

Moisture : 7% Max

Admixture : 0.5% Max

BOLD

Counts : 38/42, 40/50, 50/60,
60/70, 70/80, 80/90.

Moisture : 7% Max

Admixture : 0.5% Max

TJ JAVA

Counts : 50/60, 60/70, 70/80

80/90, 90/100, 100/120

Moisture : 7% Max

Admixture : 0.5% Max

BLANCHED PEANUTS

Counts : 38/42, 40/50, 50/60

Moisture : Below 6

Admixture : 0.5% Max

GROUNDNUT OIL CAKE

Protein : 45% - 48%

Major Raw Materials: Cake residual after nut oil was extracted.

PURE GROUNDNUT CRUDE OIL

Content : 48%

Aflatoxin: 4ppb, 5ppb, 10ppb, 15ppb, 20ppb

FFA : (Below 1% FFA)

(1% FFA) (2% FFA)

(or as per the requirement)

PROCESS

Pre - Cleaner raw material machine removes the dust, stones, over size and under size Groundnut shells from the stuff. Through the mechanical process of Cyclone-1, de-stoner and Cyclone-2. Ground Shells pass through the Decorticators. They are specially made to crack the outer shells of the Groundnuts.

Decortication and Gravity Separation Process: Decortication is used for shelling the Groundnuts into husk and Kernels. The husks are thrown away where Kernels are screen out.

The Gravity Separator is specifically meant for removing impurities and separating of a number of products with an identical particle size and distinct particles are removed from the stuff.

With the help of Hopper the waste solid materials can be discharged under gravity into a receptacle below from the groundnut Seeds.

Sorting process through Machine which removes broken, immature and insected, splitted Groundnut seeds from the stuff. Sorting process through hand which removes spouted, discolored, other colored, damaged and splitted Seeds from the stuff.

Through the Grading & Marking process the Groundnut seeds are graded into different grades according to their size with counting their weight in Ounce. Moisture test is done to measure the level of moisture in Groundnut seeds.

Additionally, consumers are eased with the availability of varieties of Groundnut seeds hygienically packed free from external contaminants like dust, stone, hay, any metal etc. with metal detector machine and packed in the jute and Vaccum bags demanded by the customers.
